## Trends in tax audits and legislative changes for CFO

The hottest topic of this year's changes is the Amendment to the Income Tax Act adopted by the Parliament at the beginning of September. Following several years of restrictions, we are pleased to inform you that the majority of changes is business-friendly. The greatest advantage for companies is the increase in the "super-deduction" for research and development to double the original amount, i.e. to 200% of legitimate costs.

Together with Mr. Mojmír Beňo, specialist at the Ministry of Finance, we will have a closer look at the long-awaited amendment to the VAT Act, which transposes EU law, is known under the working title "quick fixes" and should become valid on 01/01/2020.

Last but not least, our tax advisors will share with you experiences from pending tax audits focused on VAT and transfer prices.
